Dave Balch knows about crisis. He has been caregiver for his wife through four bouts with breast cancer since 2002, including six surgeries, two rounds of chemotherapy, and three rounds of radiation. Together they have been to over 320 medical appointments, plus Dave did the scheduling, drove most of the 30,000+ miles related to her care, and much more, all while maintaining his home business and taking care of their ranch, two horses, two dogs, two cats, and a really mean parrot that his wife has had since 1957.
